PROFESSIONAL SUMMARY

I am an IT undergraduate with prolific skills in software development, full stack web application development. I am passionate about quality, performance and reliability. I am seeking to join your team as a junior software engineer. Experienced in Node.js, Express.js, JavaScript, HTML, CSS, React, PostgreSQL, MongoDB, Git version control and software testing, I am looking forward to learn and collaborate with your team towards bigger projects.

EXPERIENCE

Eleli Afrika

2023-present

Trainee Software engineer

- I got introduced to software crafting fundamentals. I built a strong foundation based on frontend development using a JavaScript library, React.js.
- I got to sharpen my written and oral communication skills and learnt how to relate with team members.
- Gained experience delivering results through collaboration across disciplines, features teams and partners.
-

Open-source projects

2022-Present

Frontend development projects

- To practice on team work and contribution, I got introduced to open-source projects which enhanced my knowledge when it comes to git version control.
- I learnt vital skills such as perfect communication through the essence of writing. Through the vast exposure to GitHub, I equipped myself with knowledge on how to do great documentation through spicy Readme files.
- Open-source contribution exposed me to the real taste of a tech work environment, time management and problem solving.
