PROFESSIONAL SUMMARY

I am a bachelor's of Computer Science undergraduate from South Eastern Kenya University, I am seeking to join your team as a software engineer intern who is ready to collaborate with experienced professionals across the business to develop and refine software solutions. I bear skills in Frontend web application development. I hold a grasp of: JavaScript, TypeScript, Tailwind CSS, Express, React.js, Next.js, PostgreSQL, Git & GitHub and Jira. I am looking forward to gain hands on experience with cutting edge technologies and real-world software development projects. I would like to contribute to your company in achieving its goals to exceed client's expectations.

EXPERIENCE

Personal Projects.
Frontend Development

- Apparel Store with React and Redux toolkit for state management; The aim of this project was to learn about state management using Redux toolkit.
- An Inventory web application; An inventory web-app culminating crud functionality and the ability to perform actions. I used React, Bootstrap and json server for the backend.
- My portfolio; As a frontend developer, I developed a portfolio website to showcase my skills and harbour some of the projects I have built.
- I am current working on a next.js web application.

Internship (Lupleg LLC)   *Jan-April 2024 Frontend development*

- To practice on team work and contribution, I got introduced to open-source projects
- which enhanced my knowledge when it comes to GIT version control and JIRA tool.

- I learnt vital skills such as perfect communication through the essence of writing.
- Through the vast exposure to GitHub.
  While at this internship I developed my skills in Tailwind CSS and built my technical skills
- in
React.js
